

Enbat Group.

**enbat**  
Intelligence

# Company Profile.

We transform real operational experience into intelligent, ethical, and scalable digital solutions that empower modern enterprises.

---

# WHO WE ARE

## A Purpose-Driven Evolution

Enbat Intelligence represents the natural evolution of the Enbat legacy—extending our commitment to ethical innovation, sustainability, and impact-driven solutions into the enterprise technology landscape.

*"We don't just build systems. We build intelligent, sustainable futures for businesses that share our values."*

# OUR UNIQUE ADVANTAGE

*Technology Born from Real Experience!*

## *What Sets Us Apart:*

 10+ Years of hands-on operational experience in food, manufacturing, retail & wellness sectors

 Lived Challenges transformed into intelligent solutions—supply chain, procurement, customer experience, analytics

 Seasoned Tech Team with deep expertise in ERP architecture, AI, automation & user-centric design

***Result: Next-generation platforms that understand your business rhythm, not just theory***

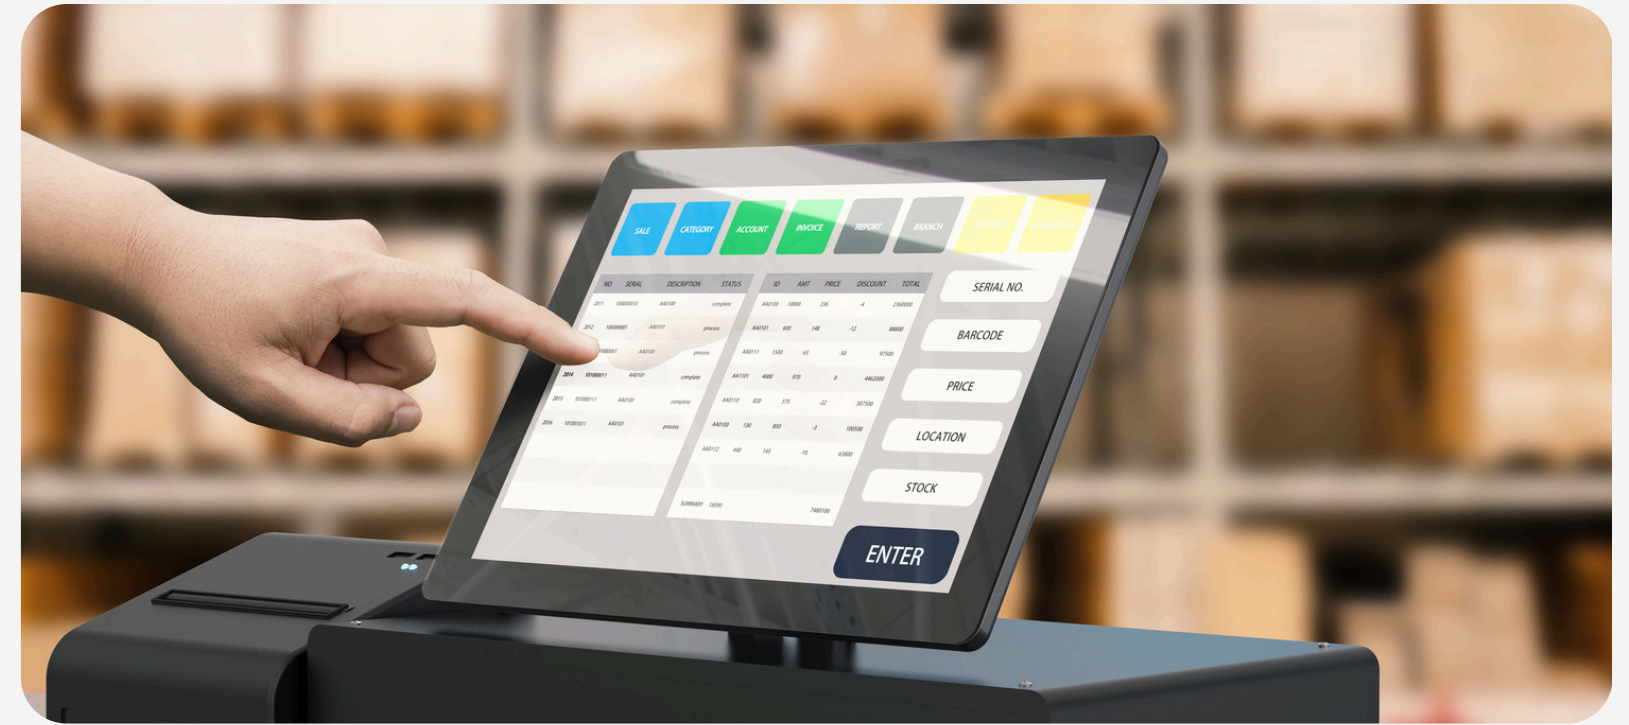

# OUR Services

## 1. *Integrated HoReCa Solution: POS + ERP*

Complete hospitality management system for Hotels, Restaurants & Café.

### Front-of-House (POS System):

- Real-time order management & kitchen display systems (KDS)
- Table management with floor plans & reservations
- Multi-channel ordering (dine-in, takeaway, delivery, online)
- Integrated payment processing (split bills, tips, multiple payment methods)
- Customer loyalty programs & CRM integration
- Menu engineering with profitability analytics
- Mobile ordering & self-service kiosks

### Back-of-House (ERP System):

- Inventory & procurement management with automated reordering
- Recipe management & costing with real-time profitability tracking
- Supplier relationship management with purchase order automation
- Multi-location & franchise management with centralized control
- Staff scheduling & payroll integration
- Financial accounting (P&L, cash flow, cost centers)
- Food safety & compliance tracking (HACCP, allergen management)
- Waste management & sustainability metrics
- Central kitchen management for multi-unit operations

## 2. ERP for Manufacturing

**Comprehensive enterprise resource planning tailored for manufacturing operations**

- Production planning & scheduling with capacity optimization
- Bill of Materials (BOM) management & version control
- Quality control & compliance tracking
- Supply chain & procurement automation
- Shop floor management with real-time monitoring
- Inventory & warehouse management (raw materials to finished goods)
- Cost accounting & financial integration
- Maintenance management (preventive & predictive)
- Batch & lot tracking with full traceability

## 3. *Sustainability Tracking & Management*

**Advanced ESG performance monitoring inspired by leading platform**

### **360° view on Sustainability**

- Carbon footprint calculation & emissions tracking
- Environmental impact metrics (water, waste, energy consumption)
- Social impact monitoring (diversity, equality, health & safety)
- Governance compliance & regulatory reporting
- Predictive analytics for sustainability performance
- Automated data collection from IoT sensors & operational systems
- ESG reporting dashboards aligned with global standards (GRI, SASB, TCFD)
- Target tracking & performance predictions
- Sustainability report generation with audit trails
- Supply chain sustainability tracking & ethical sourcing verification

Intelligence

## 4. *The Enbat Intelligence Edge*

AI-powered forecasting, automation, IoT intelligence, seamless integrations, and real-time analytics that transform operations end-to-end.

### **AI Integration & Intelligent Automation**

- Demand forecasting & predictive analytics
- Dynamic pricing optimization
- Intelligent chatbots & virtual assistants
- Anomaly detection & fraud prevention
- Automated reporting & insights generation

### **Automation & Process Intelligence**

- Robotic Process Automation (RPA)
- Workflow optimization
- Document processing & digitization
- End-to-end business process automation

### **Connected Intelligence**

- IoT integration: Real-time sensor monitoring (temperature, humidity, equipment status)
- Business Intelligence: Power BI & custom analytics dashboards
- System integration: Seamless connectivity across all business functions
- API ecosystem: Connect with third-party platforms & services

# OUR APPROACH

Enbat Intelligence represents the natural evolution of the Enbat legacy—extending our commitment to ethical innovation, sustainability, and impact-driven solutions into the enterprise technology landscape.

01

## Discovery

*We begin by deeply understanding your business goals, operational challenges, workflows, and user needs—ensuring every solution is rooted in real context and aligned with your strategic vision.*

03

## Development

*We build robust, AI-enabled systems with precision—integrating technology, automation, and seamless business logic.*

02

## Design

*We architect tailored, user-centric solutions that align with your strategy, operational needs, and future scalability.*

04

## Deployment

*We ensure smooth rollout with zero disruption through structured implementation, training, data migration, and onboarding.*

# OUR VISION

## *The Future We're Building*

A future where businesses make decisions through intelligence, grow ethically, embrace human-centric technology, and achieve progress aligned with sustainability.

### **A world where:**

- Business decisions are powered by insight—not guesswork
- Organizations scale with clarity, purpose, and integrity
- Technology is intelligent, human-centric, and built for a better tomorrow
- Growth and sustainability advance together, creating long-term impact
